**Project Description** (attach additional pages if necessary)

This tidal wetland mitigation project is located at the northern portion of Floyd Bennett Field, east of Shore (Belt) Parkway Bridge over Mill Basin. The designated wetland mitigation area consists of existing unvegetated intertidal wetland that is lined and mostly scattered with construction debris which includes, but not limited to, concrete blocks, deteriorated bulkhead, boat, and concrete bunker. Patches of existing vegetated intertidal wetland consisting of *Spartina Alterniflora* are also found within the project site. The removal of this debris is a big part of the Project scope of work, which also includes, but is not limited to; regarding, installing concrete revetment, planting and maintenance of wetland and upland plants.

(1) ✓ **Target Subcontracting Percentage**

Percentage of total contract dollar value that agency estimates will be awarded to subcontractors in amounts under \$1 million for construction and professional services.

10 %
